

**ABSTRACT OF THE DISCLOSURE****EDITING MESSAGING SESSIONS FOR A RECORD**

5       A method, system and program for editing a messaging session  
for a record are provided. A particular user from among multiple  
users associated with a messaging session is enabled to edit a  
messaging entry previously submitted in the messaging session.  
The edit to the messaging entry is then saved with the messaging  
10       session, such that the particular user is enabled to edit the  
messaging session prior to saving the messaging session as a  
record. In addition, the recorded messaging session with the  
edit to the messaging entry is distributed among the users  
associated with the messaging session.
